

ENVS Course Outcome

(AECC 2) By the end of the offered courses, the students are expected to have a broad, integrated understanding of the major problems associated with Ecology and the food chain, natural resources, pollution of the atmosphere, water, the land surface etc.

The courses also offer appropriate and holistic approaches towards environmental legislation as well as the contemporary issues related to environment such as global warming, ozone depletion, occupational health hazards. Therefore, the students are expected to feel confident understanding the whole existence and the interconnectedness in the nature
