

Programme Outcomes Computer Science Honours (Under CBCS)

By the end of this program the graduates will be able to:

- Display thorough knowledge programming using C, JAVA, Mysql, HTML, PHP, Python and prolog language and different data structures
- Demonstrate the knowledge of Computer Hardware, Firmware for electronics and digital circuits related to microprocessor, microcontroller and embedded system design.
- Display the knowledge of programming using of high end software like Keil, VHDL, embedded C etc. for firmware and Hardware design.
- Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Study B.Tech, MSc and MCA, as well as undertake research; display competence in working in diverse arenas of software development and software management, IOT and embedded system several contemporary fields.

Programme Outcomes Computer Science General (Under CBCS)

- Program Outcome (Computer Science General) By the end of this program the graduates will be able to:
- Display thorough knowledge programming using C, JAVA, Mysql, HTML, PHP, Python and prolog language and different data structures
- Demonstrate the knowledge of Computer Hardware, Firmware for electronics and digital circuits related to embedded system design.
- Display the knowledge of programming using of high end softwares like Keil, VHDL, embedded C etc. for firmare and Hardware design
- Undertake development of software.
- Go on to study B.Tech, MSc and MCA, as well as undertake research; display competence in working in diverse arenas of software development and software management, IOT and embedded system several contemporary fields
