

PROGRAMME OUTCOME ECONOMICS (GENERAL) UNDER CBCS

- The curriculum for the Economics Generals course cultivates a mindset that enables students to accurately analyze economic and socio-economic issues.
- The extensive theoretical knowledge gained from studying microeconomics, macroeconomics, and optionally, public finance, enables individuals to analyze an economic problem or issue with a specific emphasis on its theoretical foundation.
- In addition, the study of development economics and the curriculum on the Indian economy exposes students to a diverse range of concepts, enabling them to get an awareness of the factors influencing the present global landscape.
