

## **PROGRAMME OUTCOME ENVS (UNDER CBCS)**

- Since the Department of Environmental Studies has not yet introduced any General or Honors Course, it is challenging to evaluate the outcome. However, we expect that the following can be regarded as the result of the collective endeavor of the ENVS department up to this point:
- The observance of significant environmental days (such as World Environment Day, Earth Day, World Biodiversity Day, etc.) raised awareness among the students of our college and fostered their understanding of the crucial role nature plays in our lives.
- The events provided an opportunity for the students to improve their abilities by actively participating and articulating their thoughts on how to minimize waste in order to protect the environment.
- Instilled a sense of societal duty.
- The Department of Environmental Studies successfully managed educational excursions, such as a visit to a book fair and an excursion. They gave support to faculty members from other departments, such as Geography and Commerce.
