Certificated ISO based

1. Introduction:

The introduction highlights the goals of the green audit and provides an overview of the college's commitment to sustainability. It also describes the scope of the audit. To evaluate the college's environmental impact, sustainability practices, and areas for growth, the Green Audit Report was conducted at MAHARANI KASISWARI COLLEGE. This all-encompassing analysis has assessed the college's energy use, waste management, water consumption, transportation options, and general environmental consciousness analysis. The findings and suggestions to strengthen the college's dedication to environmental responsibility and sustainable practices are detailed in this study.

Green Audit Working Team (2018-19):

Sl No	Name of the Members	Designation
1	Dr.Sima Chakrabarti	Principal
2	Dr. Tapan Kumar Chand	IQAC Coordinator
3	Dr.Susanta Kumar Bag	NAAC Coordinator
4	Smt. Lipika Das Nandi	Bursar
5	Dr.Susanta Kumar Bag	GB Member
6	Dr.Anindita Ray (Chakravarti)	GB Member
7	Mr.Anindya Basu	GB Member
8	Dr.Sayanti Bhawmik	Member
9	Smt. Sunanda Mukherjee	Member
10	Sri Subrata Kundu	Non-Teaching Member
11	Payel Shaw	General Secretary, Student

2. The Necessity of a Green Audit:

The need for green audits, also known as environmental audits or sustainability audits, is rising in today's society for several reasons.

- (a) Effects on the Environment: Green audits help to assess and lessen an organization's harmful environmental impact. They analyse factors such as energy consumption, trash generation, water use, and emissions to find areas that could be improved to decrease environmental harm.
- **(b)** Conformity with Regulations: The environmental regulations and rules established in many countries must be followed by organizations. Green audits help colleges adhere to standards to avoid penalties or other legal implications for non-compliance.
- (c) Savings on Expenses: Green audits can identify inefficient practices, providing opportunities for cost savings. By studying energy use, resource

consumption, and waste management, businesses can put strategies into practice to reduce operational costs and increase overall efficiency.

- (d) Reputation and the Expectations of Stakeholders: Customers and other stakeholders now call organisations to adopt more environmentally friendly practices. Green audits promote trust among customers, employees, investors, and communities by demonstrating an organization's transparency and commitment to sustainability.
- (e) Risk Management: Environmental hazards can have serious financial and reputational ramifications for firms, including pollution events, regulatory non-compliance, and supply chain interruptions. By evaluating environmental management systems, ensuring sufficient controls are in place, and putting preventative measures in place to deal with possible problems, green audits assist in identifying and mitigating these risks.
- (f) Continuous Improvement: Green audits encourage a continuing commitment to sustainability rather than being one-time events. Organizations can see trends, set goals, and implement improvement initiatives by routinely evaluating and tracking environmental performance. This iterative process promotes a culture of sustainability and propels long-lasting transformation.
- (g) Sustainable Development Goals (SDGs): An international framework for solving urgent environmental and social issues is provided by the Sustainable Development Goals. Organizations can better align their operations with these objectives with the aid of green audits, paving the way for a more just and sustainable future. Green audits are essential to evaluate, enhance, and confirm environmental performance. They allow companies to control risks, comply with rules, cut costs, improve reputations, and support sustainable development.

3. Methodology for Green Audit:

Audits of an organization's environmental performance and practices are known as "green," "environmental," or "sustainability" audits. They entail assessing the company's influence on the environment, resource usage, waste management, and adherence to environmental legislation. Here is a procedure for carrying out a green audit:

- (a) Planning:
- (b) Identify audit team and resources:
- (c) Develop an audit plan: Create a detailed plan outlining audit activities, timelines, responsibilities, and communication channels.
- (d) Data Collection:

- (e) Gather information:
- (f) Conduct site visits and interviews:
- (g) Review documentation:
- (h) Evaluation and Analysis:
- (i) Assess environmental impacts:
- (j) Evaluate compliance:
- (k) Identify strengths and weaknesses:
- (1) Quantify results:
- (m) Reporting:
- (n) Prepare an audit report:
- (o) Communicate results:
- (p) Follow-up and Improvement:
- (q) Develop an action plan:
- (r) Monitor progress:
- (s) Continuous improvement:

The methodology adopted to conduct the Green Audit of the Institution had the following components.

3.1. On-siteVisit:

The Green Audit Team carried out the five-day field trip. The tour's main goal was to evaluate the Institution's waste management procedures, energy conservation tactics, and other aspects of its green cover. The protocols for sample collection, preservation, and analysis were followed scientifically.

3.2. Focus Group Discussion:

The nature club, staff, and management members participated in focus group discussions on various facets of the green audit. Identification of attitudes and awareness towards environmental issues at the institutional and local levels was the main topic of discussion.

3.3. Energy and waste management Survey:

The audit team evaluated the college's waste generation, disposal, and treatment facilities as well as its energy usage pattern with the assistance of teachers and students. A comprehensive questionnaire survey method was used to carry out the monitoring.

4. Target Areas of Green Auditing:

Energy Consumption:

The college's electrical and HVAC usage trends are dissected in this section. It detects energy-efficient practices and points out places to make improvements, such as through lighting retrofits, HVAC system optimisation, and the introduction of energy-saving devices.

Waste Management:

Recycling initiatives and other waste management practices on campus are all part of the evaluation. It proposes measures to cut down on garbage, boost recycling, and promote eco-friendly behaviour all over campus.

Water Usage:

The college's water consumption, conservation initiatives, and opportunities for water savings are all evaluated in this report. It recommends promoting water conservation through the use of water-efficient fixtures, and educational programmes.

Transportation:

In this section, we take a look at how the college neighbourhood gets around. Bicycle-sharing initiatives, financial incentives for carpooling, and collaborations with public transportation providers are some of the eco-friendly commute solutions investigated.

Green Spaces and Biodiversity:

The report assesses the college's green areas, biodiversity protection initiatives, and landscaping methods. Preserving natural areas, growing native species and supporting programmes that help pollinators are all possible suggestions.

Curriculum and Awareness:

This analysis considers the ways in which sustainability and environmental studies are taught and discussed on campus. It suggests fostering environmental awareness and green initiatives across all academic fields.

Stakeholder Engagement:

Student, professor, and staff participation in sustainability initiatives is assessed in this report. It suggests ways to increase participation and diversity in environmentally friendly activities.

Future Goals and Targets:

This section establishes attainable sustainability targets for the university based on audit findings. It lays out both immediate and far-off goals for improving the organization's environmental impact.

Conclusion:

The implementation plan details the steps to be taken, who will be responsible for them, and when they will be completed in order to meet the suggested sustainability targets. Budgetary constraints, collaboration with external organisations, and methods for assessing performance are all possibilities.

Yearly Records (2018--19):

Electrical device/items	Number	Power(watt)	Usage time (hr/day)
Normal Tubelight	170	6800	6.30 am to 2.30 pm
LED Tubelight	96	1920	Do
Normal Bulb	0	0	Do
LED Bulb	9	81	Do
Ceiling Fan	227	13620	Do
Wall fan	8	480	Do

Normal tube light & Fan

4.2. Waste Management:

- **4.2.1. Recycling:**Even though recycling containers could be found all throughout campus, the audit discovered that there was insufficient separation of recyclable items and inadequate information regarding products that might be recycled. Raising the recycling rate can be done in a number of ways, including by enhancing the signs, providing clear instructions, and implementing a comprehensive recycling education programme.
- **4.2.2. Composting:**To appropriately dispose of organic waste produced by Hostel occupants (both boys and girls), composting facilities might be set up at the organisation. Composting not only reduces the quantity of waste sent to landfills but also produces useful compost that may be utilised for campus landscaping and gardening.

Table: Different types of waste generated in the college and their disposal

Types of waste	Particulars	Disposal method
E-Waste	Computers, electrical	After a while, we can
	and electronic parts	offer these from a
		separate tank.
Plastic waste	Pen, Refill, Plastic water	Single-use plastic
	bottles and other plastic	bottles, jars, and bags.
	containers, wrappers etc	Encourage reusable
		water bottles and other
		containers. Establish
		plastic recycling
		containers, and after a
		certain time, we can sell
		the recyclables directly.
Solid wastes	Paper waste, Damaged	Maintenance energy
	furniture, paper plates,	conversion reuse.
	food wastes	College composting
		systems turn food waste
		into nutrient-rich
		compost for campus
		landscaping and
		community gardens.
		Institutions can work
		with local farms to
		collect food waste.
Chemical wastes	Laboratory waste	Water neutralises.
		Follow safety rules when
		handling hazardous

		waste.
Wastewater	Washing, urinals,	Soak pits
	bathrooms	
Glass waste	Broken glass wares from	Glass should be recycled
	the labs	separately from other
		recyclables in glass
		recycling containers.
		Contact local recycling
		centres to recycle glass
		properly.
Sanitary Napkin	-	Burn

4.3. Water Usage:

4.3.1. Water Fixtures: Numerous locations within the college had outdated and ineffective water fixtures, which caused excessive water use. Water resources can be saved by swapping these fixtures for low-flow models and encouraging staff and students to practice water-saving habits.

Water management table:

Water Management Tasks	Frequency	Responsible Party
Routine examination of water	Monthly	Green Audit Working Team
supplies		
Testing for drinking water	Half-yearly	Do

	management of water?	pollution reduction, and	
		sustainable water management.	
		Water rights and allocation	
		procedures should be clear to	

		distribute	water	fairly	among
		multiple us	sers.		
15	Have any methods for conserving	NIL			
	water been implemented?				

4.4. Transportation:

4.4.1. Public Transport: The college's carbon footprint can be significantly reduced by encouraging employees and students to use public transport. Sustainable transport solutions can be promoted by offering concession provided by the college for public transportation like train and bus and encouraging students to use more bicycle as college provide bicycle parking area.

4.5. Overall Environmental Awareness:

4.5.1. Curriculum Integration:The institution can integrate environmental awareness and sustainability into its curriculum across various subject areas. This strategy will guarantee that students receive instruction and training in environmental stewardship, encouraging sustainable thinking.

Environmental	Parameters	Program time
awareness across		
Language Arts	Discuss texts from literature that are in some way connected to topics concerning the environment, such as conservation or environmental advocacy. Compose poetry or essays that argue for the protection of the environment and use persuasion. Conduct research on a variety of environmental	Whole year
	topics, then present your findings. Through various awareness programs, they understand the environmental laws and regulations that apply on the local, national, and international levels. Discuss the roles that governments, NGOs, and people play in the effort to solve environmental problems. Investigate the environmental concerns from both a historical and cultural point of view.	
Arts	Investigate the causes of climate change and possible solutions to the problem. Analyse the impact that human activities have had on different landscapes as well as the distribution of natural resources. Studies should be done on urbanization, logging, and industry's impact on the natural environment. Investigate geographical approaches to resolving environmental issues, such as environmentally responsible land management planning.	Whole year

Science	Conduct studies on environmental issues, such as assessing water quality, soil analysis, power consumption or recycling. To better comprehend environmental patterns and forecasts, consider using mathematical models. Investigate the repercussions of environmental actions on the economy, such as doing cost-benefit analyses for environmentally friendly projects.	Whole Year
	Study subjects include ecosystems, biodiversity, and the interconnectedness of all living things.	
Physical Education	Encourage students to develop an appreciation for the natural world by having them participate in outdoor sports and activities. Talk about the significance of physical activity for both one's own health and the health of the environment (for example, taking bike instead of the car).	Whole year
NSS	To enhance the amount of green coverand fight against deforestation, organizing tree-planting events in local communities and educational institutions is important. To combat littering and to encourage a clean environment, it is important to organi routine clean-up efforts in public places like parks, roads. To educate both students and members of the general public about environmental issues such as climate change, waste management, renewable energy, and conservation, workshops and seminars should be organized. It should be a priority to create opportunities for individuals to engage with the natural world and develop a sense of ownership over its preservation through participating in hikes and other outdoor activities. To raise awareness about environmental issues and motivate people to take action, you might use social media, posters, and booklets.	Whole year

Plantation Programmes

4.5.2. Student Engagement: A culture of sustainability can be promoted among students by supporting student-led projects, creating environmental groups, and holding awareness events and workshops.

5. Eco-Friendly Campus:

5.1.Floral Diversity:

The following are some actions to take into account when setting up a plantation programme at your college:

- -Organise a group of academics, employees, and students who are interested in managing the plantation programme. Assign roles and duties to make the execution go smoothly.
- -Consult with local environmental professionals or NGOs working for environmental conservation to discover native or adapted tree species that are well-suited to the climate, soil, and goal of the plantation programme. Research and choose suitable plants species.
- -To obtain the necessary approvals or permits for planting plants on campus or in the neighborhood, check with the college administration or other appropriate authorities.
- Look into possible funding options, including grants, sponsorships, or collaborations with nearby companies or environmental organizations. This will aid in defraying the price of buying plants, equipment, and other required supplies.

- Establish the plantation event's date, time, and venue. Plan the delivery of the plants, tools, and equipment to the planting location. Make sure that safety precautions are in place, including appropriate instruction on planting methods and equipment use.
- -Promote the planting programme within the campus community by using various communication channels, such as posters, social media, emails, and word-of-mouth, in order to raise awareness and find volunteers. Encourage everyone to volunteer, including alumni, faculty, staff, and students.
- -Volunteers should be gathered at the planting site on the appointed planting day. Give them the equipment, instructions, and direction they need to plant the sapling correctly. Foster a sense of accomplishment and community pride while fostering teamwork.
- -Stress the significance of taking care of the freshly planted saplings. This could entail routine weeding, mulching, watering, and pest or disease inspection. To guarantee the long-term well-being and survival of the plants, think about setting up a system for volunteers or staff members.
- -After the plantation programme, evaluate the impact and accomplishment of the effort. Keep an eye on the plants' growth and survival rate. To determine areas for improvement and to organize upcoming plantation programmes, collect participant and stakeholder input.

Eco-Friendly Campus

Plantation of Medicinal plants:

On the backyard ground of our college, we planted variety of medicinal plants like Tulsi, Aloevera etc. Once we have determined the species of these plants, we will work to preserve them in our medicinal gardens by means of multiplication. Through the appropriate method, it is accessible to any and all interested parties or agencies. A medical backyard ground is a specific location on the grounds of an educational institution that is devoted to the growth and maintenance of a large variety of different kinds of medicinal plants. Teachers and Students have access to it as a resource for teaching and study, which makes it possible for them to investigate and learn about the many different qualities and applications that medicinal plants can have. The cultivation of a medicinal garden on a college campus has the potential to confer significant value and benefits on the surrounding academic community as well as on society.

Figure: Our Backyard Medical Garden

7. Conclusion: According to the results of a recent green audit, the MAHARANI KASISWARI COLLEGE has identified a few sites on campus that may use some work to further sustainability goals. Implementing the offered solutions has the potential to result in a number of positive environmental outcomes, including decreased energy consumption, improved waste management, enhanced water use efficiency, expanded sustainable transportation options, and heightened environmental consciousness. By putting these alterations into effect, MAHARANI KASISWARI COLLEGE will be able to demonstrate to its pupils how to responsibly care for the environment and make a contribution towards a more sustainable future.

1. Introduction:

The introduction highlights the goals of the green audit and provides an overview of the college's commitment to sustainability. It also describes the scope of the audit. To evaluate the college's environmental impact, sustainability practices, and areas for growth, the Green Audit Report was conducted at MAHARANI KASISWARI COLLEGE. This all-encompassing analysis has assessed the college's energy use, waste management, water consumption, transportation options, and general environmental consciousness analysis. The findings and suggestions to strengthen the college's dedication to environmental responsibility and sustainable practices are detailed in this study.

2. The Necessity of a Green Audit:

The need for green audits, also known as environmental audits or sustainability audits, is rising in today's society for several reasons.

- (a) Effects on the Environment: Green audits help to assess and lessen an organization's harmful environmental impact. They analyse factors such as energy consumption, trash generation, water use, and emissions to find areas that could be improved to decrease environmental harm.
- **(b)** Conformity with Regulations: The environmental regulations and rules established in many countries must be followed by organizations. Green audits help colleges adhere to standards to avoid penalties or other legal implications for non-compliance.
- (c) Savings on Expenses: Green audits can identify inefficient practices, providing opportunities for cost savings. By studying energy use, resource

consumption, and waste management, businesses can put strategies into practice to reduce operational costs and increase overall efficiency.

- (d) Reputation and the Expectations of Stakeholders: Customers and other stakeholders now call organisations to adopt more environmentally friendly practices. Green audits promote trust among customers, employees, investors, and communities by demonstrating an organization's transparency and commitment to sustainability.
- (e) Risk Management: Environmental hazards can have serious financial and reputational ramifications for firms, including pollution events, regulatory non-compliance, and supply chain interruptions. By evaluating environmental management systems, ensuring sufficient controls are in place, and putting preventative measures in place to deal with possible problems, green audits assist in identifying and mitigating these risks.
- (f) Continuous Improvement: Green audits encourage a continuing commitment to sustainability rather than being one-time events. Organizations can see trends, set goals, and implement improvement initiatives by routinely evaluating and tracking environmental performance. This iterative process promotes a culture of sustainability and propels long-lasting transformation.
- (g) Sustainable Development Goals (SDGs): An international framework for solving urgent environmental and social issues is provided by the Sustainable Development Goals. Organizations can better align their operations with these objectives with the aid of green audits, paving the way for a more just and sustainable future. Green audits are essential to evaluate, enhance, and confirm environmental performance. They allow companies to control risks, comply with rules, cut costs, improve reputations, and support sustainable development.

3. Methodology for Green Audit:

Audits of an organization's environmental performance and practices are known as "green," "environmental," or "sustainability" audits. They entail assessing the company's influence on the environment, resource usage, waste management, and adherence to environmental legislation. Here is a procedure for carrying out a green audit:

- (a) Planning:
- (b) Identify audit team and resources:
- (c) Develop an audit plan: Create a detailed plan outlining audit activities, timelines, responsibilities, and communication channels.
- (d) Data Collection:

- (e) Gather information:
- (f) Conduct site visits and interviews:
- (g) Review documentation:
- (h) Evaluation and Analysis:
- (i) Assess environmental impacts:
- (j) Evaluate compliance:
- (k) Identify strengths and weaknesses:
- (1) Quantify results:
- (m) Reporting:
- (n) Prepare an audit report:
- (o) Communicate results:
- (p) Follow-up and Improvement:
- (q) Develop an action plan:
- (r) Monitor progress:
- (s) Continuous improvement:

The methodology adopted to conduct the Green Audit of the Institution had the following components.

3.1. On-siteVisit:

The Green Audit Team carried out the five-day field trip. The tour's main goal was to evaluate the Institution's waste management procedures, energy conservation tactics, and other aspects of its green cover. The protocols for sample collection, preservation, and analysis were followed scientifically.

3.2. Focus Group Discussion:

The nature club, staff, and management members participated in focus group discussions on various facets of the green audit. Identification of attitudes and awareness towards environmental issues at the institutional and local levels was the main topic of discussion.

3.3. Energy and waste management Survey:

The audit team evaluated the college's waste generation, disposal, and treatment facilities as well as its energy usage pattern with the assistance of teachers and students. A comprehensive questionnaire survey method was used to carry out the monitoring.

4. Target Areas of Green Auditing:

Energy Consumption:

The college's electrical and HVAC usage trends are dissected in this section. It detects energy-efficient practices and points out places to make improvements, such as through lighting retrofits, HVAC system optimisation, and the introduction of energy-saving devices.

Waste Management:

Recycling initiatives and other waste management practices on campus are all part of the evaluation. It proposes measures to cut down on garbage, boost recycling, and promote eco-friendly behaviour all over campus.

Water Usage:

The college's water consumption, conservation initiatives, and opportunities for water savings are all evaluated in this report. It recommends promoting water conservation through the use of water-efficient fixtures, and educational programmes.

Transportation:

In this section, we take a look at how the college neighbourhood gets around. Bicycle-sharing initiatives, financial incentives for carpooling, and collaborations with public transportation providers are some of the eco-friendly commute solutions investigated.

Green Spaces and Biodiversity:

The report assesses the college's green areas, biodiversity protection initiatives, and landscaping methods. Preserving natural areas, growing native species and supporting programmes that help pollinators are all possible suggestions.

Curriculum and Awareness:

This analysis considers the ways in which sustainability and environmental studies are taught and discussed on campus. It suggests fostering environmental awareness and green initiatives across all academic fields.

Stakeholder Engagement:

Student, professor, and staff participation in sustainability initiatives is assessed in this report. It suggests ways to increase participation and diversity in environmentally friendly activities.

Future Goals and Targets:

This section establishes attainable sustainability targets for the university based on audit findings. It lays out both immediate and far-off goals for improving the organization's environmental impact.

Conclusion:

The implementation plan details the steps to be taken, who will be responsible for them, and when they will be completed in order to meet the suggested sustainability targets. Budgetary constraints, collaboration with external organisations, and methods for assessing performance are all possibilities.

Yearly Records (2019-20):

	management of water?	pollution reduction, and	
		sustainable water management.	
		Water rights and allocation	
		procedures should be clear to	

		distribute	water	fairly	among
		multiple us	sers.		
15	Have any methods for conserving	NIL			
	water been implemented?				

4.4. Transportation:

4.4.1. Public Transport: The college's carbon footprint can be significantly reduced by encouraging employees and students to use public transport. Sustainable transport solutions can be promoted by offering concession provided by the college for public transportation like train and bus and encouraging students to use more bicycle as college provide bicycle parking area.

4.5. Overall Environmental Awareness:

4.5.1. Curriculum Integration:The institution can integrate environmental awareness and sustainability into its curriculum across various subject areas. This strategy will guarantee that students receive instruction and training in environmental stewardship, encouraging sustainable thinking.

Environmental	Parameters	Program time
awareness across		
Language Arts	Discuss texts from literature that are in some way connected to topics concerning the environment, such as conservation or environmental advocacy. Compose poetry or essays that argue for the protection of the environment and use persuasion. Conduct research on a variety of environmental	Whole year
	topics, then present your findings. Through various awareness programs, they understand the environmental laws and regulations that apply on the local, national, and international levels. Discuss the roles that governments, NGOs, and people play in the effort to solve environmental problems. Investigate the environmental concerns from both a historical and cultural point of view.	
Arts	Investigate the causes of climate change and possible solutions to the problem. Analyse the impact that human activities have had on different landscapes as well as the distribution of natural resources. Studies should be done on urbanization, logging, and industry's impact on the natural environment. Investigate geographical approaches to resolving environmental issues, such as environmentally responsible land management planning.	Whole year

Science	Conduct studies on environmental issues, such as assessing water quality, soil analysis, power consumption or recycling. To better comprehend environmental patterns and forecasts, consider using mathematical models. Investigate the repercussions of environmental actions on the economy, such as doing cost-benefit analyses for environmentally friendly projects.	Whole Year
	Study subjects include ecosystems, biodiversity, and the interconnectedness of all living things.	
Physical Education	Encourage students to develop an appreciation for the natural world by having them participate in outdoor sports and activities. Talk about the significance of physical activity for both one's own health and the health of the environment (for example, taking bike instead of the car).	Whole year
NSS	To enhance the amount of green coverand fight against deforestation, organizing tree-planting events in local communities and educational institutions is important. To combat littering and to encourage a clean environment, it is important to organi routine clean-up efforts in public places like parks, roads. To educate both students and members of the general public about environmental issues such as climate change, waste management, renewable energy, and conservation, workshops and seminars should be organized. It should be a priority to create opportunities for individuals to engage with the natural world and develop a sense of ownership over its preservation through participating in hikes and other outdoor activities. To raise awareness about environmental issues and motivate people to take action, you might use social media, posters, and booklets.	Whole year

Plantation Programmes

4.5.2. Student Engagement: A culture of sustainability can be promoted among students by supporting student-led projects, creating environmental groups, and holding awareness events and workshops.

5. Eco-Friendly Campus:

5.1.Floral Diversity:

The following are some actions to take into account when setting up a plantation programme at your college:

- -Organise a group of academics, employees, and students who are interested in managing the plantation programme. Assign roles and duties to make the execution go smoothly.
- -Consult with local environmental professionals or NGOs working for environmental conservation to discover native or adapted tree species that are well-suited to the climate, soil, and goal of the plantation programme. Research and choose suitable plants species.
- -To obtain the necessary approvals or permits for planting plants on campus or in the neighborhood, check with the college administration or other appropriate authorities.
- Look into possible funding options, including grants, sponsorships, or collaborations with nearby companies or environmental organizations. This will aid in defraying the price of buying plants, equipment, and other required supplies.

- Establish the plantation event's date, time, and venue. Plan the delivery of the plants, tools, and equipment to the planting location. Make sure that safety precautions are in place, including appropriate instruction on planting methods and equipment use.
- -Promote the planting programme within the campus community by using various communication channels, such as posters, social media, emails, and word-of-mouth, in order to raise awareness and find volunteers. Encourage everyone to volunteer, including alumni, faculty, staff, and students.
- -Volunteers should be gathered at the planting site on the appointed planting day. Give them the equipment, instructions, and direction they need to plant the sapling correctly. Foster a sense of accomplishment and community pride while fostering teamwork.
- -Stress the significance of taking care of the freshly planted saplings. This could entail routine weeding, mulching, watering, and pest or disease inspection. To guarantee the long-term well-being and survival of the plants, think about setting up a system for volunteers or staff members.
- -After the plantation programme, evaluate the impact and accomplishment of the effort. Keep an eye on the plants' growth and survival rate. To determine areas for improvement and to organize upcoming plantation programmes, collect participant and stakeholder input.

Eco-Friendly Campus

Plantation of Medicinal plants:

On the backyard ground of our college, we planted variety of medicinal plants like Tulsi, Aloevera etc. Once we have determined the species of these plants, we will work to preserve them in our medicinal gardens by means of multiplication. Through the appropriate method, it is accessible to any and all interested parties or agencies. A medical backyard ground is a specific location on the grounds of an educational institution that is devoted to the growth and maintenance of a large variety of different kinds of medicinal plants. Teachers and Students have access to it as a resource for teaching and study, which makes it possible for them to investigate and learn about the many different qualities and applications that medicinal plants can have. The cultivation of a medicinal garden on a college campus has the potential to confer significant value and benefits on the surrounding academic community as well as on society.

Figure: Our Backyard Medical Garden

7. Conclusion: According to the results of a recent green audit, the MAHARANI KASISWARI COLLEGE has identified a few sites on campus that may use some work to further sustainability goals. Implementing the offered solutions has the potential to result in a number of positive environmental outcomes, including decreased energy consumption, improved waste management, enhanced water use efficiency, expanded sustainable transportation options, and heightened environmental consciousness. By putting these alterations into effect, MAHARANI KASISWARI COLLEGE will be able to demonstrate to its pupils how to responsibly care for the environment and make a contribution towards a more sustainable future.

1. Introduction:

The introduction highlights the goals of the green audit and provides an overview of the college's commitment to sustainability. It also describes the scope of the audit. To evaluate the college's environmental impact, sustainability practices, and areas for growth, the Green Audit Report was conducted at MAHARANI KASISWARI COLLEGE. This all-encompassing analysis has assessed the college's energy use, waste management, water consumption, transportation options, and general environmental consciousness analysis. The findings and suggestions to strengthen the college's dedication to environmental responsibility and sustainable practices are detailed in this study.

Green Audit Working Team (2021-22):

Sl No	Name of the Members	Designation
1	Dr.Sima Chakrabarti	Principal
2	Dr.Tapan Kumar Chand	IQAC Coordinator
3	Dr.Susanta Kumar Bag	NAAC Coordinator
4	SriShyam Prasad Ram	Bursar
5	Dr.Susanta Kumar Bag	GB Member
6	Dr.Anindita Ray (Chakravarti)	GB Member
7	Mr.Anindya Basu	GB Member
8	Sri Sourav Dutta Mustafi	Member
9	Dr.Gobinda Mondal	Member
10	Sri SubrataKundu	Non-Teaching Member
11	Payel Shaw	General Secretary, Student

2. The Necessity of a Green Audit:

The need for green audits, also known as environmental audits or sustainability audits, is rising in today's society for several reasons.

- (a) Effects on the Environment: Green audits help to assess and lessen an organization's harmful environmental impact. They analyse factors such as energy consumption, trash generation, water use, and emissions to find areas that could be improved to decrease environmental harm.
- **(b)** Conformity with Regulations: The environmental regulations and rules established in many countries must be followed by organizations. Green audits help colleges adhere to standards to avoid penalties or other legal implications for non-compliance.
- (c) Savings on Expenses: Green audits can identify inefficient practices, providing opportunities for cost savings. By studying energy use, resource

consumption, and waste management, businesses can put strategies into practice to reduce operational costs and increase overall efficiency.

- (d) Reputation and the Expectations of Stakeholders: Customers and other stakeholders now call organisations to adopt more environmentally friendly practices. Green audits promote trust among customers, employees, investors, and communities by demonstrating an organization's transparency and commitment to sustainability.
- (e) Risk Management: Environmental hazards can have serious financial and reputational ramifications for firms, including pollution events, regulatory non-compliance, and supply chain interruptions. By evaluating environmental management systems, ensuring sufficient controls are in place, and putting preventative measures in place to deal with possible problems, green audits assist in identifying and mitigating these risks.
- (f) Continuous Improvement: Green audits encourage a continuing commitment to sustainability rather than being one-time events. Organizations can see trends, set goals, and implement improvement initiatives by routinely evaluating and tracking environmental performance. This iterative process promotes a culture of sustainability and propels long-lasting transformation.
- (g) Sustainable Development Goals (SDGs): An international framework for solving urgent environmental and social issues is provided by the Sustainable Development Goals. Organizations can better align their operations with these objectives with the aid of green audits, paving the way for a more just and sustainable future. Green audits are essential to evaluate, enhance, and confirm environmental performance. They allow companies to control risks, comply with rules, cut costs, improve reputations, and support sustainable development.

3. Methodology for Green Audit:

Audits of an organization's environmental performance and practices are known as "green," "environmental," or "sustainability" audits. They entail assessing the company's influence on the environment, resource usage, waste management, and adherence to environmental legislation. Here is a procedure for carrying out a green audit:

- (a) Planning:
- (b) Identify audit team and resources:
- (c) Develop an audit plan: Create a detailed plan outlining audit activities, timelines, responsibilities, and communication channels.
- (d) Data Collection:

- (e) Gather information:
- (f) Conduct site visits and interviews:
- (g) Review documentation:
- (h) Evaluation and Analysis:
- (i) Assess environmental impacts:
- (j) Evaluate compliance:
- (k) Identify strengths and weaknesses:
- (1) Quantify results:
- (m) Reporting:
- (n) Prepare an audit report:
- (o) Communicate results:
- (p) Follow-up and Improvement:
- (q) Develop an action plan:
- (r) Monitor progress:
- (s) Continuous improvement:

The methodology adopted to conduct the Green Audit of the Institution had the following components.

3.1. On-siteVisit:

The Green Audit Team carried out the five-day field trip. The tour's main goal was to evaluate the Institution's waste management procedures, energy conservation tactics, and other aspects of its green cover. The protocols for sample collection, preservation, and analysis were followed scientifically.

3.2. Focus Group Discussion:

The nature club, staff, and management members participated in focus group discussions on various facets of the green audit. Identification of attitudes and awareness towards environmental issues at the institutional and local levels was the main topic of discussion.

3.3. Energy and waste management Survey:

The audit team evaluated the college's waste generation, disposal, and treatment facilities as well as its energy usage pattern with the assistance of teachers and students. A comprehensive questionnaire survey method was used to carry out the monitoring.

4. Target Areas of Green Auditing:

Energy Consumption:

The college's electrical and HVAC usage trends are dissected in this section. It detects energy-efficient practices and points out places to make improvements, such as through lighting retrofits, HVAC system optimisation, and the introduction of energy-saving devices.

Waste Management:

Recycling initiatives and other waste management practices on campus are all part of the evaluation. It proposes measures to cut down on garbage, boost recycling, and promote eco-friendly behaviour all over campus.

Water Usage:

The college's water consumption, conservation initiatives, and opportunities for water savings are all evaluated in this report. It recommends promoting water conservation through the use of water-efficient fixtures, and educational programmes.

Transportation:

In this section, we take a look at how the college neighbourhood gets around. Bicycle-sharing initiatives, financial incentives for carpooling, and collaborations with public transportation providers are some of the eco-friendly commute solutions investigated.

Green Spaces and Biodiversity:

The report assesses the college's green areas, biodiversity protection initiatives, and landscaping methods. Preserving natural areas, growing native species and supporting programmes that help pollinators are all possible suggestions.

Curriculum and Awareness:

This analysis considers the ways in which sustainability and environmental studies are taught and discussed on campus. It suggests fostering environmental awareness and green initiatives across all academic fields.

Stakeholder Engagement:

Student, professor, and staff participation in sustainability initiatives is assessed in this report. It suggests ways to increase participation and diversity in environmentally friendly activities.

Future Goals and Targets:

This section establishes attainable sustainability targets for the university based on audit findings. It lays out both immediate and far-off goals for improving the organization's environmental impact.

Conclusion:

The implementation plan details the steps to be taken, who will be responsible for them, and when they will be completed in order to meet the suggested sustainability targets. Budgetary constraints, collaboration with external organisations, and methods for assessing performance are all possibilities.

Yearly Records (2021-22):

Electrical device/items	Number	Power(watt)	Usage time (hr/day)
Normal Tubelight	170	6800	6.30 am to 2.30 pm
LED Tubelight	110	2220	Do
Normal Bulb	0	0	Do
LED Bulb	9	81	Do
Ceiling Fan	243	14580	Do
Wall fan	8	480	Do

Normal tube light & Fan

4.2. Waste Management:

- **4.2.1. Recycling:**Even though recycling containers could be found all throughout campus, the audit discovered that there was insufficient separation of recyclable items and inadequate information regarding products that might be recycled. Raising the recycling rate can be done in a number of ways, including by enhancing the signs, providing clear instructions, and implementing a comprehensive recycling education programme.
- **4.2.2. Composting:**To appropriately dispose of organic waste produced by Hostel occupants (both boys and girls), composting facilities might be set up at the organisation. Composting not only reduces the quantity of waste sent to landfills but also produces useful compost that may be utilised for campus landscaping and gardening.

Table: Different types of waste generated in the college and their disposal

Types of waste	Particulars	Disposal method	
E-Waste	Computers, electrical	After a while, we can	
	and electronic parts	offer these from a	
		separate tank.	
Plastic waste	Pen, Refill, Plastic water	Single-use plastic	
	bottles and other plastic	bottles, jars, and bags.	
	containers, wrappers etc	Encourage reusable	
		water bottles and other	
		containers. Establish	
		plastic recycling	
		containers, and after a	
		certain time, we can sell	
		the recyclables directly.

		recyclables in glass	
		recycling containers.	
		Contact local recycling	
		centres to recycle glass	
		properly.	
Sanitary Napkin	-	Burn	

4.3. Water Usage:

4.3.1. Water Fixtures: Numerous locations within the college had outdated and ineffective water fixtures, which caused excessive water use. Water resources can be saved by swapping these fixtures for low-flow models and encouraging staff and students to practice water-saving habits.

Water management table:

Water Management Tasks	Frequency	Responsible Party

Plantation Programmes

4.5.2. Student Engagement: A culture of sustainability can be promoted among students by supporting student-led projects, creating environmental groups, and holding awareness events and workshops.

5. Eco-Friendly Campus:

5.1.Floral Diversity:

The following are some actions to take into account when setting up a plantation programme at your college:

- -Organise a group of academics, employees, and students who are interested in managing the plantation programme. Assign roles and duties to make the execution go smoothly.
- -Consult with local environmental professionals or NGOs working for environmental conservation to discover native or adapted tree species that are well-suited to the climate, soil, and goal of the plantation programme. Research and choose suitable plants species.
- -To obtain the necessary approvals or permits for planting plants on campus or in the neighborhood, check with the college administration or other appropriate authorities.

- Look into possible funding options, including grants, sponsorships, or collaborations with nearby companies or environmental organizations. This will aid in defraying the price of buying plants, equipment, and other required supplies.
- Establish the plantation event's date, time, and venue. Plan the delivery of the plants, tools, and equipment to the planting location. Make sure that safety precautions are in place, including appropriate instruction on planting methods and equipment use.
- -Promote the planting programme within the campus community by using various communication channels, such as posters, social media, emails, and word-of-mouth, in order to raise awareness and find volunteers. Encourage everyone to volunteer, including alumni, faculty, staff, and students.
- -Volunteers should be gathered at the planting site on the appointed planting day. Give them the equipment, instructions, and direction they need to plant the sapling correctly. Foster a sense of accomplishment and community pride while fostering teamwork.
- -Stress the significance of taking care of the freshly planted saplings. This could entail routine weeding, mulching, watering, and pest or disease inspection. To guarantee the long-term well-being and survival of the plants, think about setting up a system for volunteers or staff members.
- -After the plantation programme, evaluate the impact and accomplishment of the effort. Keep an eye on the plants' growth and survival rate. To determine areas for improvement and to organize upcoming plantation programmes, collect participant and stakeholder input.

Eco-Friendly Campus

Plantation of Medicinal plants:

On the backyard ground of our college, we planted variety of medicinal plants like Tulsi, Aloevera etc. Once we have determined the species of these plants, we will work to preserve them in our medicinal gardens by means of multiplication. Through the appropriate method, it is accessible to any and all interested parties or agencies. A medical backyard ground is a specific location on the grounds of an educational institution that is devoted to the growth and

maintenance of a large variety of different kinds of medicinal plants. Teachers and Students have access to it as a resource for teaching and study, which makes it possible for them to investigate and learn about the many different qualities and applications that medicinal plants can have. The cultivation of a medicinal garden on a college campus has the potential to confer significant value and benefits on the surrounding academic community as well as on society.

Figure: Our Backyard Medical Garden

7. Conclusion: According to the results of a recent green audit, the MAHARANI KASISWARI COLLEGE has identified a few sites on campus that may use some work to further sustainability goals. Implementing the offered solutions has the potential to result in a number of positive environmental outcomes, including decreased energy consumption, improved waste management, enhanced water use efficiency, expanded sustainable transportation options, and heightened environmental consciousness. By putting these alterations into effect, MAHARANI KASISWARI COLLEGE will be able to demonstrate to its pupils how to responsibly care for the environment and make a contribution towards a more sustainable future.
